admissions

### ABOUT HAITI

Located less than 1,000 miles from the U.S., Haiti is plagued by both political instability and natural disasters. 80% of the population lives below the poverty line, surviving on less than \$2 a day. Access to healthcare is essentially non-existent. According to UNICEF, Haiti has the highest rate of infant, under-five and maternal mortality in the Western Hemisphere. The January 2010 earthquake caused an estimated 300,000 injuries, which exacerbated the limited healthcare services.

- 31,246** Vaccinations
- 3,832** Surgeries (including ambulatory)
- 2,874** Dental clinic consultations
- 2,469** Emergencies
- 1,789** HIV program consultations
- 652** Tuberculosis consultations
- 314** Rehydration center consultations
- 565** Local people employed

*Note: Some departments were affected by COVID decreasing our services while other services were increased to meet pandemic needs*
