

NPH USA
Raising Children. Supporting Families.
Transforming Lives.

Located less than 1,000 miles from the U.S., Haiti is plagued by both political instability and natural disasters. 80% of the population lives below the poverty line, surviving on less than \$2 a day.

NPH USA is helping save thousands of lives through the support of St. Damien Pediatric Hospital, the only hospital wholly dedicated to pediatric and prenatal care in Haiti – a country of 11.5 million people.

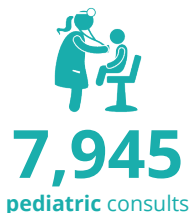

NPH'S ST. DAMIEN PEDIATRIC HOSPITAL

2021 HIGHLIGHTS

Haiti was again beset by extreme challenges in 2021: the assassination of the president, an earthquake, a fuel shortage, and unrelenting violence. These devastating events exacerbated the nation's political instability. However, even in the face of dire circumstances, St. Damien Pediatric Hospital remained open for the entirety of 2021 to provide essential, life-giving and life-saving services to the most vulnerable population.

- Vaccinated 90% of staff in a country with an overall in a country with an overall vaccination rate of less than 2%
- Increased security with installation of cameras and fences
- Added maternity triage and an isolation unit for any infectious or immunocompromised children
- Developed and approved the 2022-2026 Strategic Plan designed to improve quality of service, increase the ratio of health professionals to patients, update facilities, and modernize equipment

2021 IMPACT

PAUL - A LIFE TRANSFORMED

For most Haitians, access to medical care is extremely limited and unaffordable. But at St. Damien Pediatric Hospital, vulnerable women and children find life-saving care. One of the many lives saved at St. Damien is the life of Paul*. After years of receiving misdiagnoses elsewhere, Paul and his family came to St. Damien in 2013 and finally received a diagnosis of nephrotic syndrome, a chronic condition. Since then, Paul has received ongoing treatment by a multidisciplinary team of doctors for a modest fee. Just think of the intense anxiety that was lifted from Paul's family!

Paul, now 12 and at home with his family and friends, is just one example of the many lives saved at St. Damien. For every child that arrives, the staff at St. Damien asks themselves, "What would we do if this patient were my child?"

* Name has been changed to respect the child's privacy
