For most Haitians, access to medical care is extremely limited and unaffordable. But at St. Damien Pediatric Hospital, vulnerable women and children find life-saving care. One of the many lives saved at St. Damien is the life of Paul*. After years of receiving misdiagnoses elsewhere, Paul and his family came to St. Damien in 2013 and finally received a diagnosis of nephrotic syndrome, a chronic condition. Since then, Paul has received ongoing treatment by a multidisciplinary team of doctors for a modest fee. Just think of the intense anxiety that was lifted from Paul's family!

Paul, now 12 and at home with his family and friends, is just one example of the many lives saved at St. Damien. For every child that arrives, the staff at St. Damien asks themselves, “What would we do if this patient were my child?”

* Name has been changed to respect the child’s privacy
