NPH Bolivia 2024 Impact

109
children and adults supported

46
local people employed

21
K - University graduates

Did You Know?

- **Residential Care** - In 2024, we transitioned to a family-based care model, creating a home-like environment that fosters stronger caregiver-child bonds. We integrated children into the community through education and recreational activities, reinforcing their social connections. By upholding children's rights, we ensured access to quality education, participation in decisions, and a safe environment for growth.
- **Family Reintegration** - Through personalized plans, we strengthened family bonds, improved economic stability, and enhanced housing conditions. Parental skill workshops, recognized by local authorities, empowered families to create safer homes. Seed capital initiatives enabled economic growth, ensuring long-term stability.
- **Youth Empowerment** - This program supported young adults transitioning from residential care to independent living. We focused on job placement and rebuilding social networks, equipping them with the tools needed for self-sufficiency.
- **Farm** - A variety of vegetables are grown in gardens at the children's houses. These gardens give the children a chance to acquire new skills in the field as well as learn the values of responsibility and patience. Food grown in the children's gardens is used for meals, thus supplementing the home's budget.
